

WHAT IS CLAIMED IS:

1. A portable outdoor cooking apparatus comprising:
 - a cooking surface having a first receiver and a second receiver;
 - a frame hingedly attached to said cooking surface wherein said frame comprises a positioning ring and a handle and said handle weighs less than said

5 cooking surface; and

 - a post comprising a first segment and a second segment wherein said first segment removably attaches for storage to said cooking surface first receiving port and said second segment removably attaches to said cooking surface second receiving port for storage and wherein said first segment and said

10 second segment removably attach to form said post, and said post removably attaches to said positioning ring to position said cooking surface along said post.
2. The portable outdoor cooking apparatus of Claim 1 wherein said post first segment removably attaches to a stand.
3. The portable outdoor cooking apparatus of Claim 1 wherein said post first segment further includes a peg for an operator to step on to secure said post first segment into ground.
4. The portable outdoor cooking apparatus of Claim 3 wherein said post is cylindrical.

5. The portable outdoor cooking apparatus of Claim 1 further including a rotisserie assembly having a first bracket and a second bracket wherein said first bracket removably attaches to said cooking surface first receiver and said second bracket removably attaches to said cooking surface second receiver and wherein said first bracket and said second bracket

5 cooperatively hold a rod wherein food may be positioned on said rod for cooking.

6. A portable outdoor cooking kit comprising:

a cooking surface having a first receiver and a second receiver and wherein said cooking surface is hingedly and foldably connected to a frame comprising a handle and a positioning ring;

10 a post comprising a detachable first segment wherein said first segment may be removably attached to said cooking surface first receiver, a detachable second segment wherein said second segment may be removably attached to said cooking surface second receiver, and said post may cooperatively attach to said positioning ring.

7. The portable outdoor cooking kit of claim 6 further including a stand wherein said stand may removably attach to said post.

8. The portable outdoor cooking kit of claim 7 further including a rotisserie assembly wherein said rotisserie assembly may removably attach to said cooking surface first receiver and second receiver.

9. The portable outdoor cooking kit of claim 8 further including a warming oven wherein said warming oven may removably sit on said cooking surface frame.

10. The portable outdoor cooking kit of claim 9 further including a griddle wherein said griddle may be removably positioned on said cooking surface.

11. The portable outdoor cooking kit of claim 10 further including a surround grill lip wherein said surround grill lip may removably attach to said cooking surface to prevent items from slipping off said cooking surface.

12. The portable outdoor cooking kit of claim 11 further including a grill cover wherein said grill cover may removably attach to said cooking surface.

13. The portable outdoor cooking kit of claim 12 further including a firebox wherein said firebox may provide a container for holding a fire for cooking under said cooking surface.

14. The portable outdoor cooking kit of claim 13 further including a storage container for storage and transportation of said portable outdoor cooking kit.
